Pupil Premium Impact and Planned Spending Report

2020/21

Pupil Premium

2020 - 2021

The pupil premium grant was introduced in 2011 in order for schools to provide support for looked after children, service children and those from low income families to address the inequalities between those eligible for free school meals (FSM) and those children who are not. This money is known as the pupil premium grant (PPG). This additional funding is in addition to the school's main budget and we are accountable for its allocation to measures specifically targeted to address disadvantage.

Impact:

- Interventions have been implemented. Children enjoy the interventions, they have built confidence and positive changes have been made with regards to the children's mindsets. Following the end of year assessment round data shows that in most year groups the gap between pupil premium and non is closing, with one year group pupil premium out performing non.
- Funding extra-curricular clubs ensured that all children were able to access clubs. The clubs were well attended and enjoyed by all, as a result many had waiting lists and we will ensure they run again next year.
- Wide range of cultural capital opportunities planned and undertaken by each year group throughout the academic year and successfully completed. Opportunities for children to see performances, play musical instruments, participate in adventurous activities on a residential and visit a range of museums were all successful. In most cases follow-up sessions linked to the curriculum were made.
- Attendance is improving. Figure for last academic year was 96.3%, slightly above the national and local authority figure (N- 95.7% and LA – 95.8%). The number of PAs has reduced as a result of monitoring undertaken, first aid calling procedure, follow up calls, parental support and support from APSO, learning mentor, school nurse and Catholic Care Councillor.
- School nurse and Learning mentor have had a positive impact on our families, offering support not only to the individual pupil but to the family too. As part of the work supporting families, we were able to help with the funding of child care before school, after school and during the holidays. This ensured that children had appropriate care at all times.
- Learning resources allowed children the opportunity to consolidate their learning in a fun and interactive way. A lunchtime club was run for those children who did not have access to the resources at home. Pupils enjoyed using these as part of their computing time and as part of classroom teaching.
- Early Years and Years 1 & 2 teachers took part in the Maths Mastery training programme, ensuring that all children had high quality maths teaching. As part of this

package support was received for our maths lead too, enabling maths support as a whole school.
 *Attendance figures based on previous year due to non-reporting during COVID.

Review Process

To monitor progress on attainment, new measures have been included in the performance tables that will capture the achievement of pupils covered by the Pupil Premium. At St Paulinus Primary School, the usual cycle of data collection and the monitoring and tracking of the cohort's attainment, will be used to inform pupil progress and enable the early identification of need, support and appropriate intervention.

If needed review meetings will take place at each half term.

At each Pupil Progress meeting, the school will review the impact of actions taken and will plan for how the funding will be specifically allocated over the next phase. The school will look at all pupils across the school when selecting focused groups. There are some pupils who are not eligible for PP who will benefit from these groups if their needs are similar and we believe progress can be made towards individual targets.

Pupil Premium Funding and the impact of this is an agenda item on the governors' Resources committees.
